Salisbury University's Student Voice

April 7, 2009

A fourth SafeRide van could help the organization deal with the large amount of students who use the service each weekend. With another van, more students could be picked up and SafeRide could reach students faster.

What's the holdup on a fourth SafeRide van?

By Jonathan Moynihan

Staff Writer

Jon League, a driver for SafeRide, is pulled over by Salisbury Police while on Onley Road headed towards the New Zoo. The officer approaches the van full of about 20 students on the passenger side. The van reeks of alcohol, and the driver and students alike are nervous they're about to be in serious trouble.

But the officer isn't pulling over the long, off-white Salisbury van because of a traffic law violation. It's because the SafeRide phone lines have been turned off.

"Every weekend our office is flooded with phone calls and pick up requests. Our phone never stops ringing after 10 o'clock. The need is simply too great sometimes," said Executive Vice President of SafeRide Sam Klenkel. "We've thought about implement-

ing a second [phone] line, but that's just a piece of the answer."

The student run organization received the award for Outstanding Registered Student Organization last year, and with its ever-growing popularity, its need for increased effectiveness has never been greater. But sadly, these needs have not been met, specifically their need of a fourth van.

"We have been told that we were

JDL race held in memory of former student

By Laura Bounds

Staff Writer

In memory of Jerry Daniel Landsman, Salisbury University's SafeRide sponsored its seventh annual JDL Memorial 5K SafeRun Saturday, April 4. Honoring "Danny," a former SU student, supporters of all ages lined up in front of Maggs Gym at 10 a.m. to run the 3.1 miles, equivalent to two laps around campus.

SafeRide and the Fishing Club founded the event after Danny's passing in memory of him and his contribution to campus. The

Telecia Taylor photo

Runners prepare to begin the race at SafeRide's seventh annual JDL Memorial 5k SafeRun. The race is held in memory of Danny Landsman.

initial idea for a run came from Danny and his natural love of athletics and the outdoors.

"Danny always wanted to do a run as a fundraiser for SafeRide. He started the process and set up but passed away before the end of January so the SafeRide administration decided to keep it going and do it every year in memory of him," said Jerry Landsman, Danny's father. "It started as a fundraiser but con-

verted to a memorial."

Every year the JDL Run brings together various members of the Salisbury community as well as Danny's family members and friends. Due to the hard work and upbeat atmosphere created by the SafeRide staff, this year's race had a superior turnout.

"We had around 200 people come last year and from registration this year we've seen at least

Green Series: TETC uses energy efficient technology

By Stacie Manger

Staff Writer

When looking at the TETC from the outside and while roaming the halls on the way to class, one sometimes asks the question: "How can this huge, multimillion dollar building be green?"

How expensive is it energy wise? Why are there so many lights on at night when all of the other buildings are mostly dark? In a time where "going green" is the common mantra of companies, some wonder how green our SU buildings are.

Surprisingly, despite its size, the TETC is quite energy efficient.

"We have not occupied TETC for a full year, therefore some estimates will have to be done. Some months are higher and some are lower, but overall, on average, the utility costs (electric, gas, oil and water) are almost \$40,000 per month," said Tim Jones of the Energy Management Office. "I would expect that over time, as we learn the building systems and develop better control strategies for the

mechanical systems we will see a drop in utility consumption of up to five percent."

As for the persistent lights in the building, Jones said that occupancy of the TETC goes later into the night because of the computer labs and studios. Some of the lights are related to student activity, he said. Jones said there is safety and security lighting that is left on and the housekeeping staff works into the morning cleaning the TETC.

Motion sensors control a large amount of the lighting, Jones commented. The use of these sensors is considered a contribution to the "green" modification lifestyle.

Computer servers cost a lot of money, energy-wise, to run. But SU improved the infrastructure and made it more energy efficient.

"We have installed a print queue system in the computer labs which saves paper," said Chief Information Officer Jerry Waldron. "In the server area, we have moved

Contrary to what some may think, the multimillion dollar TETC is an energy efficient, "green" building, despite its large size and the high amount of technology.

State treasurer visits, discusses University growth

Sarah Lake photo

State Treasurer Nancy Kopp, President Janet Dudley-Eshbach and Deputy Treasurer for External Affairs Howard Freedlander met Tuesday.

By Vanessa Junkin

Staff Writer

Things have been changing at SU — not just physically, but also in the way the University has been interacting with the community.

Maryland State Treasurer Nancy Kopp has realized this.

At a lunch meeting with some of SU's executive, academic and student leaders, Kopp talked about some of these changes, then took a

tour and saw some of the physical changes like the TIETC.

"I see the University not only as a great educational institution but a driver of economic development for the state, so that's why I like to go and get a feeling for how things are going and what the major issues are, what people are talking about, what you're concerned about," Kopp said.

She was interested in hearing about SU's good town-gown rela-

Seminar prepares students for law school

By Gwen Ferrand

Staff Writer

This past Tuesday, Salisbury University hosted a seminar for students hoping to continue on to law school after completing their undergraduate studies. Contrary to popular belief that one has to be a political science major to be "pre-law," many students from other majors, from biology to communication arts, can apply to law school; this is one of the important points that Dr. Roberta Adams, Salisbury's pre-law advisor, stressed.

"Applying is a complicated process, and some students just aren't prepared," Adams said.

It is a time consuming process, with many of the steps being not necessarily obvious. With the fall being the best time to apply, Adams advises getting organized

and informed in the spring so as not to fall behind. "By the time [students] start [applying], if they do not have an idea of what to do it is very daunting," Adams warned.

Since law schools are looking for diversity and not just the average political science major, Adams advised students to "do what is right for you," and not what students think they need to do to be accepted.

"Some students have said there were certain courses they had taken that were helpful, but really it is a very individual thing," stated Adams when asked if there were specific routes students had taken at SU that were beneficial to them.

"Most students do best in what they like, and the temptation is to choose classes that are strategic, but that's the long way to go," she

Briefly Stated

Town Hall Meeting with Senator Cardin

On Tuesday, April 7, U.S. Senator Benjamin L. Cardin (D-MD), a member of the Senate Committee on Small Business and Entrepreneurship, will hold a town hall meeting in Salisbury with members of the Lower Shore small business community to talk about the economic downturn and provisions in the recently enacted recovery package and omnibus appropriations bill that may provide small businesses with some relief. The meeting will be held at 11 a.m. in the Worcester Room of the Guerrieri Center.

Spanish Club Fundraiser
Come out and support SU's Spanish Club! The Uno's in Fruitland will donate up to 20 percent of your dine in or carry out check to the Spanish Club between 11 a.m. and 11 p.m. on Friday, April 24, and Wednesday, April 29.

Spring into Reading at Blackwell Library

Tired of reading textbooks? Come to the annual Fiction Book Sale at Blackwell Library and Spring into Reading by purchasing a novel for summer reading! The Book Sale will be held in conjunction with National Library Week, and will run from Monday, April 13 through Monday, April 19. The sale, which will be held on the first floor of the library next to the circulation desk, will be fiction only. All novels will be on sale for 50¢ each.

Treasurer

Continued from Pg. 1

President Janet Dudley-Eshbach said the University has worked hard to make the town-gown relationship successful during her nine years here so far. She noted that SU and the city are now working together in a variety of ways.

In addition, Dudley-Eshbach said that in 2003, she began a town-gown council and she also mentioned students have contributed to the effort with days like The Big Event.

"Involving the town, communicating with our neighbors is critically important, and [Kopp] was very complimentary of the fact that we do that," said Rosemary Thomas, Vice President of University Advancement and Executive Director of the Salisbury University Foundation.

Kopp also asked the three students in attendance about reasons for choosing Salisbury and talked to them about their experience here as well as their futures.

"She was just very interested in what the students have been through," said Julius Jones, who works in governmental relations.

SU is a "growth institution" with expected long-term enrollment growth, and upcoming physical changes were discussed during Kopp's visit. The parking garage, a Perdue School building and a residence hall complex are the planned Board of Public Works projects.

Dudley-Eshbach said in the future, SU will see a new library, a fine and performing arts center and a new field house.

The new developments aren't just about University growth, Vice President of Student Affairs Ellen Neufeldt said, as "meeting the demands of our students today."

She appreciated that Kopp was able to visit despite her busy schedule. Kopp is also on the state's Board of Public Works and previously spent 27 years as a Maryland delegate.

"I think we're so fortunate that the state treasurer took the time to come, because to learn and understand the culture and heartbeat of Salisbury University, I think makes all the difference in the world as we work together in the future," Neufeldt said.

SU gets ready for growth with purchase of buildings

News from the Press Release Office

SU Maintenance Facilities to Relocate in Noland Building

The Noland Corporation is relocating and so are Salisbury University's maintenance facilities.

The plumbing supply company recently advertised for sale its South Division Street property, which borders the University. Noland may move to the Route 13 north business corridor, SU was told. The Salisbury University Foundation began negotiating for the property's purchase as part of SU's strategic expansion of its campus.

This week the Foundation and Noland announced they have finalized an agreement which will allow the Foundation to take possession in June.

The University will lease the 3.45-acre property and its 36,392-square-foot building from the Foundation once this occurs. Eventually SU's maintenance facilities will move into

the building.

The University has been designated a growth institution by the University System of Maryland and the campus has expanded to accommodate growth in size and quality.

Currently, three major projects are under construction or in planning: SU's first parking garage is under construction at the corner of Bateman and Wayne streets. It will have parking for some 850 vehicles and is scheduled to open in September.

This fall construction is expected to begin on a new home for the Franklin P. Perdue School of Business and a new student residence complex, with retail space, at the current site of the Allenwood Shopping Center. These two projects are expected to open in fall 2011.

Law

Continued from Pg. 1

advised.

As far as skills go, Adams notes that sharpening writing and reasoning skills are very important in being successful in the process.

Salisbury alum David Mills, who continued on to the University of Maryland's law program, praises the political science department for preparing him adequately.

"It's a surprisingly strong program, which people probably would not expect coming from such a small school," Mills said.

Conversely, current student Allan White, who is majoring in history, plans to continue to law school after SU and stated, "I think not being in political science, which is what they would expect, gives me an edge over others competing to be accepted."

Salisbury has kept records for the past six or seven years on the success of alumni who are accepted into law school after attending SU, and the numbers are increasing. In years past, not as many students were applying to law school, Adams said, but now more are becoming better prepared. As for where the students choose to go for law school, local schools such as University of Maryland and the University of Maryland Baltimore County tend to be more popular, and institutions like Penn State are gaining interest.

One of the reasons that he encouraged the conversion was that "it doesn't matter where you've been, God will love you." He also said that "if you believe, it's like God stabs you in your heart with a smiley face, like a tattoo."

The campaign sparked interest across campus and many other student clubs got involved.

A lot of non-Cru members were in attendance which was really great," said Cru member Addie Kauzlarich. "It also brought out a lot of other campus ministries like FCA [Federation of Christian Athletes] and Wesley Foundation," she added.

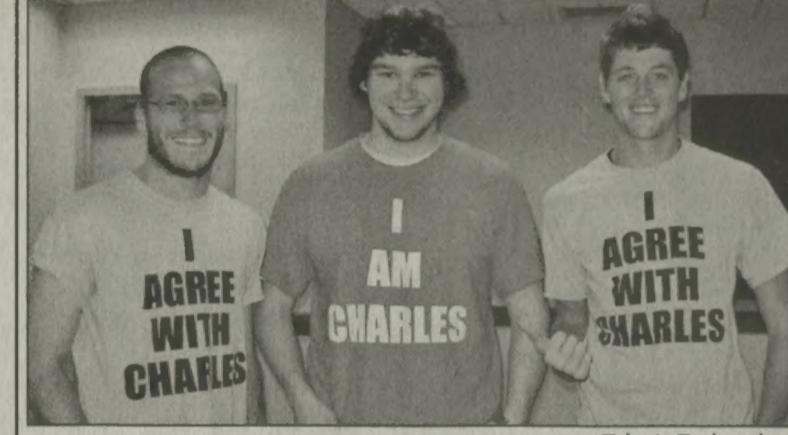

He then went to speak of how he went into a relationship with a Christian woman, and eventually went to church "to impress her." This was his first Christian influence that he had until he ran, literally, into a friend who invited him to Cru. After this, he went to a Bible study called G.I.G. (Guys/Girls Investigating God). Despite all of this, he continued

around 215," said Samantha Klenkel, a SafeRide team leader. "We're really happy with the turnout; we had people out here at 8:45 a.m. People that didn't even know him come out for the run every year, so I think that's awesome."

Around \$1,000 worth of prizes were given away after the race and every participant walked away with a complimentary T-shirt. Winning first place for the men was Student Activities graduate assistant Todd Ostrom, with a time of 17:25. Freshman Bridget McCarthy won first place for the women with a time of 21:12.

Currently, SU is pursuing a Leadership in Energy and Environmental Design (LEED) certification for the TETC. According to the Sustainability at SU Web site for the TETC, some floor areas have been covered with renewable and recyclable bamboo instead of tile. Most of the flooring materials are 100 percent recyclable. Around 40 percent of the building's frame is made from recycled materials. High-efficiency plumbing fixtures were installed, and as a result, water usage was reduced by 20 percent. The Web site has even more green facts about the TETC.

Despite its intimidating size, the newest building on Salisbury's campus is an excellent example of an energy efficient, green establishment.

Cru agrees with Charles

By Samantha Fisher
Staff Writer

Salisbury University's Campus Crusade for Christ (Cru) held its "I Agree With Charles" campaign on April 1, 2009, in the Nanticoke room of the Guerrieri Center. Those in attendance included different faiths and denominations, so much so that the audience outgrew the seating, and some were forced to stand in the back. Roughly 250 people attended.

There stood Charles Butcher, the student whose name was plastered all over Salisbury's campus. The international business major gave his testimony on his conversion from Atheism to Christianity. In his testimony, he spoke of his "strong Atheist" background because of how he was raised by his father. Throughout his life he would get into arguments with different people over what he believed.

One of the reasons that he encouraged the conversion was that "it doesn't matter where you've been, God will love you." He also said that "if you believe, it's like God stabs you in your heart with a smiley face, like a tattoo."

The campaign sparked interest across campus and many other student clubs got involved.

A lot of non-Cru members were in attendance which was really great," said Cru member Addie Kauzlarich. "It also brought out a lot of other campus ministries like FCA [Federation of Christian Athletes] and Wesley Foundation," she added.

Benefit for Brooke held at Monkey Barrel

By Nick Lehwald

Staff Writer

the Mulford Foundation, students and community members can take pride in the fact that they made a difference Friday night.

"This is why [my wife] Amy and I chose to live here after we graduated from SU. The love and support is unbelievable. Sometimes all this negativity on the news with politics in this town puts a dark cloud over how great the people are on the Delmarva Peninsula or the phrase we have coined during this, 'Smallsbury,'" said Rob Mulford, Brooke's father.

Added to the usual hustle and bustle of the Barrel, as it is commonly known to students, were members of the community who came by to show their support for Brooke. While the older crowd mostly filtered out by 10 p.m., the students who filled the Barrel were in a boisterous mood, enjoying the atmosphere and live music. Playing that night were local bands Pugsly (with SU faculty members), The Jon Beauchamp Experience, Pressing Strings and DJ Blade.

While the money has not been counted yet, early estimates indicate that it was a good night for the Mulford family. With half of the money from the 50/50 raffle and the cover charge going directly to

"Smallsbury" is proud to show its support for the Mulford family. Owners of the Market Street Inn and SU alumni, the Mulford family has been active members of the community for many years, and the city has shown its thanks during this troubled time. Those wishing to donate to the Brooke Mulford Foundation can visit their Web site at www.brookemulford.com and click donate.

"The community support is what is making this night tolerable. It is above and beyond what anyone could have imagined," Rob said.

"The community support is what is making this night tolerable. It is above and beyond what anyone could have imagined," Rob said.

Residents of N.D. and Minn. begin to recover from flood

By Kelley Matney
Staff Writer

As the Red River in North Dakota and Minnesota finally starts to recede, citizens try to start the cleanup process and get back to their normal lives.

President Obama declared North Dakota a federal disaster area because of the statewide flooding that was taking place. This means the federal government would cover 75 percent of the cleanup costs, while the rest is up to the state and local governments.

Initial estimates suggest tens of millions of dollars in damages to roads, bridges, and wastewater treatment plants and other public resources, as well as damage to some homes and businesses.

In Minnesota, preliminary assessments have showed more than \$20 million in public damage in seven counties, with the most damage in Clay County, where the city of Moorhead is located.

In North Dakota, Fargo's city administrator said the cost of cleaning up the Fargodome, home of the North Dakota University football team could total \$1.5 million. The building was used for filling sandbags to hold back the river.

Forecasters have said the river may rise again when more snow melts but it isn't estimated to reach the levels it reached over the last weekend in March. The river hit record heights on March 29 when it reached 40.82 feet.

Fargo Mayor Dennis Walaker said in an interview with the Associated Press that they had no immediate plans to clean up the close to 3 million sandbags at the river's edge, just in case the river level rose again.

Businesses in Fargo were allowed to reopen on April 1.

"It's going to be a slow process," said Holly Scott, at the city's emergency operations center on April 2. "We need to make sure it's safe for folks to be back at home again."

Former Attorney General Alberto Gonzales is one of six from the Bush administration who are accused of breaking international law.

Bush administration officials accused of justifying torture

By Sarah Duffy
Staff Writer

A Spanish court has taken steps towards opening a criminal investigation of six former high-level Bush administration officials with allegations that they provided the legal framework to justify the torture of prisoners at Guantanamo Bay in Cuba. Among the six who are accused of violating international law are former Attorney General Alberto R. Gonzales and David S. Addington, who was the chief of staff and legal adviser to Vice President Dick Cheney.

A 9-page complaint was prepared by Spanish lawyers and filed on March 17 by the Association for the Dignity of Prisoners, a Spanish human rights group. The complaint is based on the Geneva Convention and the 1984 Convention.

Chinese spies' GhostNet uncovered

By Laura Dignan
Staff Writer

Canadian researchers at the Information Warfare Monitor (IWM) from the University of Toronto discovered an electronic spying operation based out of China. The operation, which the researchers termed "GhostNet," has gained access to 1,000 computers in 103 countries.

The targets of GhostNet have mainly been political—NATO, the Indian Embassy in Washington, D.C. and other foreign ministries, banks, news organizations and Tibetan exile centers in Brussels, London, India and New York.

These organizations are almost certainly oblivious to the compromised situation in which they find themselves. The computers of diplomats, military attachés, private assistants, secretaries to prime ministers, journalists and others are under the concealed control of unknown assailants.

The cyber-spying process was revealed when the Toronto researchers

were asked by the exiled Tibetan leader, the Dalai Lama, to search his organization's computers in Dharamsala, India for malicious software. While the malware was found to be based in China, the researchers cannot prove that the Chinese government is linked to the operation. Similar attacks and spying operations have been detected on these same networks over the past two years and all have originated in China.

Access to these computers was gained through a Trojan Internet virus called Ghost Rat. GhostNet is able to search computer data content, read e-mails and activate web cameras and microphones to spy on live conversations.

Robert Barnett, director of the Modern Tibetan Studies Program at Columbia University, said he and other employees have been getting e-mails containing the virus Ghost Rat for about 18 months. Over time, these e-mails have become extremely sophisticated making it harder for investigators to trace the origin of the spy network.

Is Obama taking over the auto industry?

By Meredith Ray
Staff Writer

The Obama administration adopted an "industrial policy" on March 30, which will determine the products the auto industry can make and the future of these companies. The policy was adopted in its attempt to save American automakers, but many say it steps over the line of government.

"There's always been a line over which no president would cross with respect to the distinction between the public and private sectors. Obama has now crossed that line where there is no limit to government's destruction of private activity or control over it," declared Rush Limbaugh in his daily radio broadcast.

If the case does proceed, it will represent a step towards legal accountability of top Bush administration officials who are being accused of torture and mistreatment of prisoners in the campaign against terror. However, some American experts said the significance could be more symbolic than practical, and that it is unlikely the warrants would lead to arrests if the accused officials do not leave the United States.

These decisions are typically reserved for the boardroom or corporate meetings, but now the decisions are coming from the White House. This notion has drawn intense criticism from conservatives.

"When did the president become an expert in strategic corporate management?" asked Rep. Tom Price of Georgia, chairman of the conservative Republican Study Committee. "The federal government is famous for its mismanagement, yet this administration continues to demonstrate its certainty that Washington always knows best."

The Obama administration adamantly defends their actions and points to other presidents who intervened in tough economic times.

Obama's actions are "consistent with the pattern of presidents acting during economic crises," said Allan Lichtman, a professor at American University and an expert on the presidency. "And it's absolutely consistent with patterns of presidents intervening to make sure major components of the economy don't fall."

During the Great Depression, Franklin D. Roosevelt limited agricultural production to boost farm prices. In 1971, Richard Nixon froze wages and prices in an attempt to roll back inflation.

Nonetheless, the Obama administration has entered challenging political territory and officials continue to downplay the notion that Obama is taking over the auto industry.

Plan B will be available to 17-year-old girls

By Morgan Majchrzak
Staff Writer

mentally mature enough to make such a huge decision, and I am not sure if some 18-year-olds are, but the law is the law.

I really feel that the judge should have kept the original policy of 18 years or older. At 18, a woman is an adult in the eyes of the law — she can join the military, she can vote — there is no more mommy hand holding. Being 18 carries many more responsibilities, and I feel that purchasing Plan B should be one of them. Parents are not legally obligated to make medical decisions, and the bottom line is that at 18, you are an adult.

This, I feel, is absolutely ridiculous. These girls are underage and therefore still minors. Also, at 17, parents make decisions for the child because the child is still a minor in the eyes of the law. By passing this law, the judge is hypothetically supporting premarital teenage sex and the fact that if a 17-year-old thinks she is pregnant, she can now go buy a pill to make things better and make the problem go away.

I now see why teenagers are getting pregnant — it is because of judges like this that allow 17-year-olds the option to get rid of an unwanted pregnancy. Now, more teenagers will be having sex because the "quick fix" to an unwanted pregnancy is in every pharmacy. So many teenagers are going to see this as a golden opportunity to make pregnancy no longer an issue.

Dating shows like this point towards a change — average, everyday-looking people are now being featured on television. Most shows only air contestants because of their physical appearance.

More to Love will be the first dating competition show that allows any typical person to be accepted and not have their physical appearance valued over what they are inside.

Dating shows like this point towards a change — average, everyday-looking people are now being featured on television. Average Americans finally have the chance to feel just as good as good as the ones who are always on television.

This is the first show that will feature your average overweight American and reach many similar people. Now, overweight Americans will know they can find love and feel just as good as skinny, beautiful couples and

be just as happy.

Dating competitions aired on television have always featured standard size two women. Now, heavier women, who some may find not as attractive, will be featured and have the same chance that women who appear on *The Bachelor* do.

It's about time average-looking people are featured on the media. It is always the same type of people who get numerous shots at being rewarded on television. Most shows only air contestants because of their physical appearance.

More to Love will be the first dating competition show that allows any typical person to be accepted and not have their physical appearance valued over what they are inside.

Fox's new reality dating show, aptly titled "More to Love," will help, um, big-hearted people find love.

By Tara Underwood
Staff Writer

Fox's *More to Love* dating show will feature average-looking people and will be the first dating show competition for overweight people. Fox is teaming up with Mike Fleiss, producer of *The Bachelor*. The show has no set air date but is accepting contestants and will have a similar format as *The Bachelor*, with a group of women competing to win the heart of a man.

The Bachelor and *The Biggest Loser* were shows that inspired *More to Love* to be created. The ratings of both shows were extremely high and popular with American audiences. Producers of *More to Love* think the show will be a big hit with the combination of both shows in one.

This is the first show that will feature your average overweight American and reach many similar people. Now, overweight Americans will know they can find love and feel just as good as good as the ones who are always on television. Since the judge feels that 17-year-olds can make this decision, then why can't they vote or join the military? If we are allowing such a huge responsibility to fall on them with Plan B, then the age for other rights and responsibilities should be lowered, too. I feel that 17-year-olds aren't

getting pregnant — it is because of judges like this that allow 17-year-olds the option to get rid of an unwanted pregnancy.

Now, more teenagers will be having sex because the "quick fix" to an unwanted pregnancy is in every pharmacy. So many teenagers are going to see this as a golden opportunity to make pregnancy no longer an issue.

Dissent in the ranks from Klaus at G20 summit

By Chad Grills
Staff Writer

With the G20 summit a rousing spectacle for some, there are several events worth noting. UK Prime Minister Gordon Brown provided entertainment by appropriating one trillion dollars for the IMF and World Bank, declaring a "new world order is emerging." Russian President Dmitry Medvedev (not to be confused with KGB operative and Prime Minister Vladimir Putin) referred to President Obama as his "new comrade." The

anti-capitalist protesters arguing against leaders who despite capitalism provided added humor. All of this pleases those who are wide-eyed and spilling Kool-Aid from their glasses, but for those who do monitor the contents of their intellectual sustenance, take heed. The prospect of universally accepted statism is not favored by all, and in the ranks of the G20, further embedded in the European Union, is a man who is following his convictions.

Vaclav Klaus is the president of the Czech Republic and an outspoken

ponent of sanity. Klaus is a former economist who despises the state controlling individual's lives. He holds the view that Europe is now similar to the antebellum of WWII. Inasmuch as Europe was controlled by several large powers then, he sees the same happenings now.

So how does Mr. Klaus the trend-setter feel about the "real" issues like global warming and our current economic "let the kids pay it" policies? Mr. Klaus said of climate change, "environmentalism, which is a new anti-individualistic, pseudo-collectivistic

ideology based on putting nature and environment and their supposed protection and preservation before and above freedom." Rather refreshing

What of our most recent and glorious economic stimulus? Mr. Klaus has the audacity to consider our recent central planning a "way to ruin." Personally, I prefer his prime minister's characterization of a "road to hell." While holding the rotating EU presidency, Mr. Klaus has used the platform to champion an alternate viewpoint on many issues, for which I applaud him.

Electronic health care system would help U.S.

By Eric J. Buratty
Staff Writer

With increasing numbers of people demanding health care, it will only be a matter of time until the old method of medical paperwork is pushed aside all together. The new method of electronic health records will dominate the modernized health care system within the next three years because it allows for easy exchange of clinical data between hospitals, doctors and other forms of medical care.

Let's face it: no one likes filling out the same forms over and over again, whether it is personal information or medical background information. It will be constructive to modernize the current health care system through integrating electronic health records so patients do not have to depend on "snail mail," phone calls and confusing physicians' notes. So why are hospitals and other medical professions resisting electronic health records?

Hospitals argue that the conversion would be a slow, costly process. This

is due to rising maintenance costs, lack of technical knowledge by staff, and uncertainty in the investment in the short run. Of course these seem like reasonable implications for why hospitals desire to adopt different standards, but sometimes change is good.

The process would not only be environmentally friendly by saving billions of dollars each year on paper, but would also reduce time spent filling out the same information everywhere patients go, and reduce the time spent reading physicians' illegible notes.

The slow start would require some sacrifices in the short run, but with Obama's stimulus plan, there should be no reason why some effort cannot be dedicated towards this conversion process. In a professionalized sense, electronic health records would link all kinds of medical care by a keystroke. Maybe the resistance to such a productive capacity is the physicians' way of saying they care more about their budget than our health.

AP photo
Pope Benedict XVI greeted crowds in Yaoundé, Cameroon, on Wednesday, where he addressed the country's 31 bishops on the second day of his trip.

Dispersing condoms is not the answer in Africa

By Kyra Milbourne
Staff Writer

Pope Benedict XVI made his first trip to the continent of Africa as pope on Tuesday. On his way to Cameroon's capital Yaoundé, the pope said to reporters, "You can't resolve the problem of HIV with the distribution of condoms. On the contrary, it increases the problem." In addition, he said a responsible attitude towards sex would help fight the disease.

The rising issue of AIDS in

Africa has been debated by many, even causing conflict within the clergy. About two-thirds of all people in Africa are living with HIV, and the crisis continues to rise. The pope's comments caused much debate across the world, many felt the pope was just standing up for the beliefs of the church, but some thought his comments were offensive toward Africans. The Catholic Church remains true to its religious convictions, believing abstinence is the true way to preserve this protection.

To the Editor,

Although this is an unacceptable situation I think it is interesting and should be investigated. My friends and I who are black have gone to Brew River nearly every weekend since the semester began. We went to Brew River this weekend and they did not let my friends and me enter into the bar. The bouncer, who was white, told my friend that his shirt was too large, but he was wearing a polo, which was in fact a few inches below his waist. My other friend was told that he was wearing boots, which were also against the dress code. He lifted the cuff of his pants to show the bouncer that he was wearing shoes, not boots. We accepted the bouncer's decision and returned to the parking lot. Another friend of mine, who is

Hispanic, was entering Brew River wearing a jersey which was slightly oversized and the same bouncer would not let him. We stopped an individual who was white before he walked into the bar and asked him to wear the exact same jersey that our Hispanic friend was wearing. This individual wore the jersey, the EXACT same fit (oversized) as my Hispanic friend, and the bouncer allowed him to enter the club. I understand that this story affects only a small group of individuals on campus. I believe this story should be investigated or published, as I am sure we are not the first to experience this same type of situation. It is disconcerting to witness that we have not progressed from the racist norms of the past.

Mae and Hotspur rock CAC's Smoke-Free SU

By Robert Cogdell III
Staff Writer

On Saturday, April 4, clusters of SU students in blue "Smoke Free SU" shirts lined Red Square eagerly anticipating the Mae and Hotspur concert. Hosted by Colleges Against Cancer (CAC), the live performance of the two bands was organized to raise awareness of cancer and other health issues resulting from cigarette smoking.

As the two regional Myspace bands Hotspur and Mae took the platform, students rushed towards the stage and soon began jumping, fist pumping and screaming in excitement.

"I think it's amazing they're here on such a small campus compared to larger arenas they could be doing," said freshman Santana Pounce. Even Mr. Butts, the CAC mascot, joined in on the jumping action.

The concert was funded by the Wicomico County Cigarette Restitution Fund, according to CAC co-president Eric Kennedy, who said that "working with the booking agent, they knew we were with a non-profit organization and we were able to get them for much normal."

Colleges Against Cancer was

founded in 2006, and since then they have continued to "work for cancer education and advocacy," said CAC co-president Lauren Friedman. They have been awarded the Leader of Hope award, which recognized their active chapter and activities on campus.

One of their more recent events was the "I Put Out" carnival in response to Smoke Free Maryland. CAC also hosts Relay for Life, arguably the largest event where student organizations fund the American Cancer Society's fight

against cancer.

In addition to the concert, students were voluntarily invited to sign a Smoke Free Campus petition and in turn received a free red or blue t-shirt.

The Salisbury University Smoking Policy designates smoking areas for each campus building and prohibits smoking within 30 feet of entrances, which Kennedy says, "is a gray area."

"I understand why [smokers] are not supportive, but the health risks outweigh the right to smoke," Friedman said.

Students e-mail CAC@salisbury.edu for more information on the petition.

Anchor speaks at eGallery exhibit

By Diana Dwyer
Staff Writer

Pulp Fiction fans recognize "and on this invention, they show, right?" as a movie quote. At SU, it is the title of the new, innovative Electronic Gallery.

Send your questions to: lkl14480@students.salisbury.edu

"I found out that my best friend has cheated on her boyfriend while I was in love with him. My concern is that she feels little remorse for her actions. She told me that she doesn't think her cheating was a big deal because she was just drunk." "I don't know if I can ever feel the same way about her. If she doesn't feel remorse about her actions and doesn't want to be honest about her mistakes, is she the kind of person I can be best friends with? Am I overreacting?"

You're not overreacting. Forget the cheating, lying and moral issues. Help her to focus on the underlying problem; she's putting herself in dangerous and unhealthy situations and hurting the people closest to her. She doesn't need to hear that sleeping with her boyfriend's best friend is wrong -- she's not the idiot. And you're her friend who wants to help.

What would she do if you were her? Ask her. Try to avoid judging her and do your best to reach out and help her. If she refuses your help, make it clear that you won't lie or cover up for her. That's not who you are and it's not who you'll be.

"I have been doing the 'friends with benefits' thing with a guy. All of a sudden he will not answer the phone when I call. But when he calls, I am supposed to jump for him. I need to get it together because more and more I've been feeling cheap. Should I call it off and stay and try to take control of the situation?"

He really doesn't have a reason to call you back unless he's looking for more benefits. It's just how this relationship has been set up. When he avoids you, assume he's dating someone or reaping another woman's benefits. In either case, he'll call you when he wants to call you (usually at 3 a.m. when he's looking for benefits).

Rather than beating yourself up and calling yourself names, call it a mistake. Stop it. End it. Don't repeat it. Next time he calls, tell him that his benefits have run out. If he wants to know why, tell him it's about respect and the lack of it given to you.

Career Services to host Dress for Success fashion show

By Ashlee Laughlin
Staff Writer

On Thursday, April 9, Career Services will be presenting its very first business professional "Dress for Success" fashion show to exhibit proper business wear from 7 p.m. to 9 p.m. in the Wicomico Room located in the Guerrieri Center. This runway show will be conducted to spread knowledge on how to be properly dressed for all professional, business-oriented occasions.

Senior and Career Services intern Wayne Turner is the mastermind behind coordinating the show, along with his employer, Associate Director of Career Services Charlie Endicott. Turner will be hosting and will be accompanied by several performers.

Turner expressed his reason for putting together a show with such substance by mentioning how some students are unaware of how to dress appropriately for business functions.

"Mr. Endicott and I thought it would be a good idea to put on a business fashion show for faculty and students of SU. We also discussed how we could display the proper clothing options for events such as interviews and job fairs," Turner said.

Models will include a variety of Sal-

isbury University students.

"There will be a diverse group of models in our fashion show," Turner said, who hopes to reach out to every culture that exists at SU. "We want students to know how to prepare for their career appearance-wise."

In addition to the runway portion, there will be a combination of entertainment including SU's own Squawkappella, a song by Azah Ndebele and a performance by the Gospel Choir.

The "Dress for Success" Fashion Show is free for the SU community but Career Services asks everyone interested in attending to RSVP via Facebook or confirm their attendance by answering an e-mail invite sent by Charlie Endicott. Refreshments and a \$25 raffle will also be included.

Classical guitar festival bridges young and old

By Rachael Stone
Staff Writer

On Saturday, Salisbury held a guitar festival, hosted by Dr. Danielle Cumming, associate professor of music and sponsored by SU, Planet Waves and D'Addario.

The festival kicked off with "Finger Aerobics." Along with practicing before playing a piece, the students were instructed on how to correctly position their guitars and how to properly use their fingertips to create the perfect tone.

Salisbury suffers first ever CAC loss

By Tom Watson
Staff Writer

Just one week after losing their first game in 55 tries to Gettysburg, Salisbury ended another streak, 2,672 fans packed into Sea Gull Stadium Saturday night to witness Salisbury's first ever CAC loss.

The Stevenson University Mustangs (11-0, 5-0) defeated Salisbury University (11-2, 5-1) 12-8. The game ended Salisbury's streak of 105 consecutive CAC victories and handed Salisbury their second loss this regular season — something that hasn't happened since 2002.

On Tuesday night, Salisbury defeated Mary Washington 14-5. The game started slow but the Gulls turned it on, scoring six goals the third quarter to Mary Washington (7-5, 1-4).

Then there was the game on Saturday. Much tension has amounted between Salisbury and Stevenson in recent years and fans traveled down by the busload. The last time these teams met, Salisbury pounded Stevenson 20-10 in the CAC championship and it was obvious that Stevenson had something to prove.

The Mustangs came out firing to start the game, winning the opening face-off and shooting on

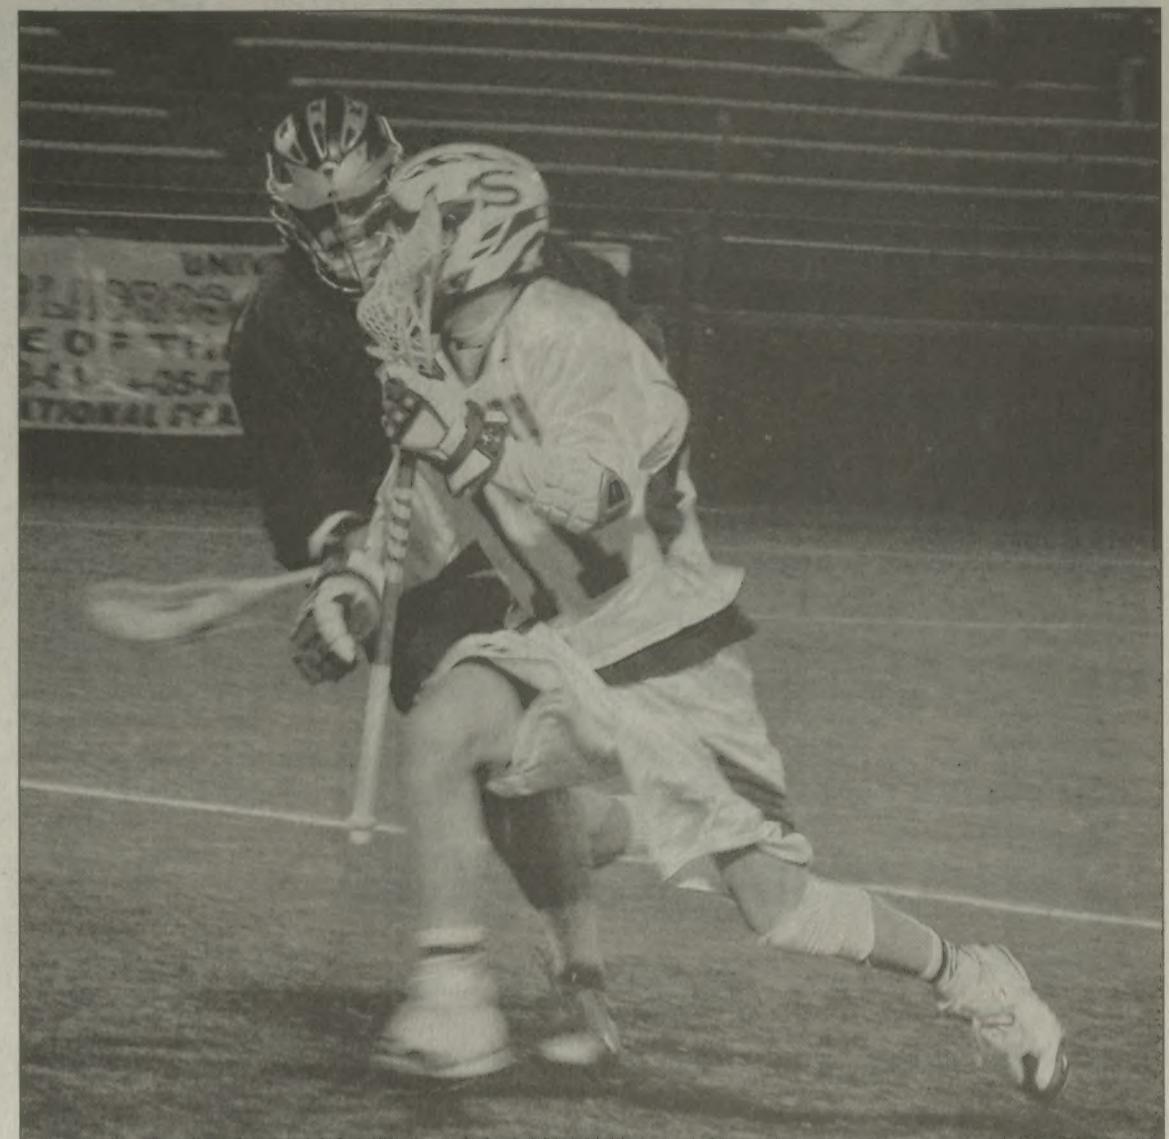

their first trip down the field, scoring a minute later to take the lead. Salisbury answered right back, leading 3-2 at the end of the first quarter.

Freshman Matt Cannone (2 goals) scored to start the second quarter and put the Gulls up by two. Stevenson then quickly tied the game at four. Junior attackman Mike Winter then scored to give Salisbury the lead 5-4, their final lead of the game, but the Mustangs answered again to go up 6-5 at the half.

The third quarter turned out to be the difference-maker. Salisbury junior Mike Von Kamecke scored to start the quarter, tying the game for the fifth time. However, Stevenson's offense proved too strong, scoring five goals in the quarter to take their largest lead of the game, 11-6, Salisbury's largest deficit all season.

The game was characterized by mistakes. The Gulls completed only 50 percent of their clears, recorded four of their seven penalties in the quarter and had eight turnovers. Senior Kyler Berkman was held to just one assist in the game.

The Sea Gulls outshot Stevenson in the fourth quarter, scoring two goals, but it wasn't enough as the Mustangs ran the clock out on Salisbury. Salisbury's next game is against St. Mary's on April 10.

Midfielder Shawn Zordan controls the ball against the Stevenson defense. The Sea Gulls are now ranked No. 5 according to the latest USILA coaches' poll.

Men's Baseball takes five

By Ben Muell
Staff Writer

The No. 19 ranked Salisbury baseball team (22-4, 10-3) defeated Gallaudet University and Allegany College last week, pushing their current winning streak to nine games. Over the course of the five wins, Salisbury tallied 82 runs while holding their opponents to only four runs.

Last Wednesday, the win here at home against Gallaudet was their second 30 run game in as many weeks. Sophomore starting pitcher Dustin Herbert improved to 5-1 on the season as he threw four perfect innings and struck out nine. Offense table setter Cody Collins went 4-for-4, scored four times and drove in two runs. The red-hot sophomore Andrew Miller went 3-for-3 with a two run bomb, while also driving in six runs. Junior Mike Celenza, sophomore Fred Kreiger and freshman Matt Beck all contributed for home runs.

The offensive firepower continued through the weekend. Last Saturday, the Gulls defeated Gallaudet 18-0 and 13-0 in the two weather shortened games. Celenza and freshman Bill Morton both taxed the Bison pitchers for solo shots.

Sophomore Andrew Miller went 3-for-3 with a two run bomb, while also driving in six runs against Gallaudet.

Sophomores Alex Duda (3-0) and Drew Baldwin (1-0) both tossed complete game shutouts holding Gallaudet to only three hits over both games. The three victories were Salisbury's eighth, ninth and tenth shutouts on the season.

In the second game of the double header, Salisbury continued to play solid baseball with a 7-2 win to close out the weekend. Chad Wolfe got his fourth win in another dominant performance. The junior only gave up three hits, one run and struck out four over five innings. The red-hot Miller continued to swing the stick well collecting two more hits as he scored twice and drove in one run. Celenza, who was hitting .451 before the weekend, also had two hits knocked in three RBIs.

This week, the Gulls will close out the CAC regular season with three games against the Stevenson University Mustangs who are currently in second place in the conference standings, four games behind the maroon and gold. The first game will be here at home on Wednesday and will be followed by a Saturday doubleheader on the road at Stevenson.

One last chance for top seed rugby team

By Jonathan Murga
Staff Writer

The past three years has been Groundhog Day for Andrew Kendall and the rugby team, as all three years have been ousted from the D-II national tournament by the eventual champion.

The Sea Gulls will take a 14-1 record this season, the sole loss happening in the first game of the year, and a number one seed into their first tournament game in the Mid-Atlantic Regionals against the University of Wisconsin.

"They're putting incredible pressure on themselves," said men's rugby coach Robert Davis. "This is their last chance to win a championship and get that ring on their finger."

The team showed their hunger in the MARFU semi-finals, beating St. Joe's 13-9, and dominating the finals against Georgetown 24-12. Derek Chell, the outside center and a senior leader for the rugby team, attributes the success to numerous aspects but truly points to one in particular.

"Work ethic is how we always competed at a national level. We're not the 15 best rugby play-

ers you'll ever see, but we are going to work harder than any 15 rugby players on the field," Chell said. "So the fact in those last 25 minutes of the game when we can run circles around that other team it just benefits us that much more."

The reason the team is so driven is 10 of the 15 starters on the team are seniors. The national tournament, held in Florida, is two weeks away and for many of these seniors, this is their last moment in the sun athletically. Andrew Kendall does not want to leave Salisbury at graduation with the same bitter taste of the past three years.

"My thing is I've been beat the last three years and the team that has put us out of the tournament has gone on to win the whole thing — Coast Guard, Middlebury and last year Radford — so I feel like yeah, you can say you might not have gone all the way, but we've always had really strong teams," Kendall said.

"Every year I've come back you feel like there is unfinished business and really this is our last run at it, our last opportunity and there's not a doubt in my mind that we are the strongest team out there. It's do or die now, there is no next year."

Softball soars over the Eagles

By Fred Hobbs
Staff Writer

Last Saturday, the No. 18-ranked Sea Gulls hosted CAC for Mary Washington in a double header. Head coach Margie Knight and assistant coaches Tom Stotter and Tee Dronenburg led the Sea Gulls.

Coming into the game, the Sea Gulls were riding a 17-game winning streak and Mary Washington was looking to end that streak. In the first game, both teams were neck-and-neck playing excellent defense with great pitching and fielding. Although Mary Washington played well throughout the game, Salisbury changed the tide when junior catcher Lauren Brenneman hit a 3-run home run in the bottom of the third inning. After that game changing performance by Brenneman, the Sea Gulls responded by scoring two runs in the third inning and five runs in the fifth.

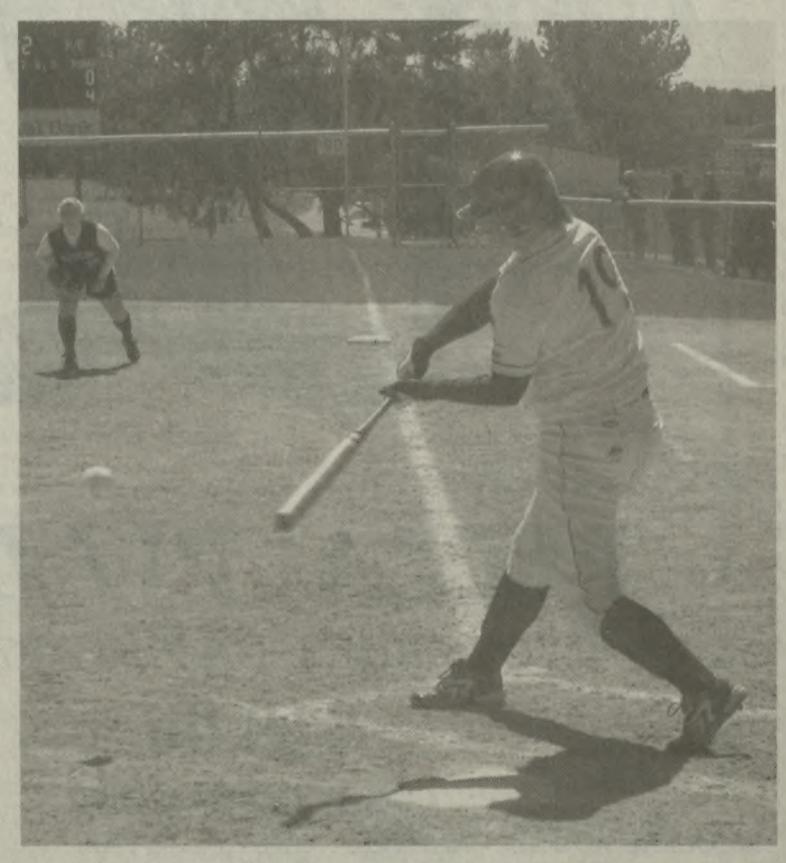

The Sea Gulls' defense did not allow another run to Mary Washington for the rest of the game. The Sea Gulls wrapped the second game up in five innings 9-1, giving them back-to-back wins on Saturday, while increasing the team's winning streak to

19 games.

Defensively, sophomore pitcher Kelsey Mills led the Sea Gulls. Mills gave up one run and one hit. On the offensive side, senior outfielder Meaghan O'Gara was the star after hitting her sixth homer of the year. Sophomore third baseman Kristin Lord added three runs batted in. After the game, head coach Knight was very excited about the win, and said, "Excellent job defensively and offensively we kept putting the bat on the ball, we have very smart ladies that process information well."

This was a big game for the Sea Gulls, as their season is winding down and they are trying to finish the regular season strong. Coach Knight gave some humor, adding, "They do all the work; they make good look."

The Sea Gulls next face Gallaudet University in a double header at home on Tuesday at 3 p.m. and 4:30 p.m.

First baseman Ali Ritter swings at a pitch against Mary Washington on Saturday.

APRIL 7, 2009 THE FLYER

Daniel Barnas winds up and serves the ball against Mary Washington. Barnas was the only Sea Gull to come away with a singles victory.

Tennis splits weekend games

By Jeremy Kummer
Staff Writer

Last Thursday, Salisbury University's men's tennis team completely dominated Virginia Wesleyan at the SU outdoor tennis courts. The win stretched Salisbury's win streak to seven in a row. In their past four games, Salisbury has not lost a match, giving them a perfect 36-0 record. Salisbury has shut out five teams and they have yet to get a shutout themselves. Winning in such a controlling manner what gave Salisbury (10-5, 3-1) their number seven ranking in the Atlantic South Region.

"They were just better than Virginia Wesleyan. Throughout the games, Salisbury was never even really threatened," said senior Dan McFarland.

Salisbury went 3-0 in doubles play and had two of those wins in straight sets at 8-0. Singles play was the same old story; as Salisbury won all six of their matches without losing a single game. The singles winners were freshman Curtis Quandt, Justin Smith and

Daniel Barnas, sophomores Giorgio Athans and Matt Copeland and junior Marcus Robinson.

After the dominating victory, Salisbury then hosted the University of Mary Washington.

This game was not only important for Capital Athletic Conference standings, but had national ranking implications as well. UMW came into Salisbury as the No. 16 team in the nation and wanted to

keep their first place CAC ranking intact. Salisbury needed the win to surpass Mary Washington in the CAC standings and ensure a number one seed in the fast approaching CAC tournament, which begins April 18.

Last year, SU topped Mary Washington in a regular season match-up and they would look to the same on Saturday. Salisbury started off slow and just could not get into a groove. Everything they did against Virginia Wesleyan on Thursday just wasn't good enough to muster a win.

A play-off birth is all but finalized for Salisbury, but two or three more wins on their record would greatly improve their record.

Salisbury has three more games left — one in the conference — before tournament play and need to rebound quickly in order to get a one or two seed. Johns Hopkins, currently ranked No. 13 in the nation, will be next up for the Sea Gulls as the Blue Jays come to town this Saturday.

Salisbury's lone conference game remaining will be against St. Mary's College on Sunday. SU is only one game out first place in the CAC behind Mary Washington. Salisbury is half-a-game in front of Stevenson for second place and will look to add to that lead over the next three games.

A play-off birth is all but finalized for Salisbury, but two or three more wins on their record would greatly improve their record.

The Sea Gull men were led by junior sprinter Cory Beebe, who competed in both the 400-meter hurdles, the 110-meter hurdles and the 4x400 relay team. Beebe placed first overall in the 400-meter with a time of 53.34 seconds and placed second overall in the 110-meter with a time of 14.88. The 4x400 relay team of freshman sprinter Paul Moore, junior sprinter Quentin Briscoe, junior sprinter Mike Marfut and Beebe placed fourth with a time of 32.01, finishing behind Columbia, La Salle and the College of New Jersey.

Junior sprinter Delanie Springs from the 100-meter dash with a time of 10.78 seconds. Springs also finished second in the 200-meter with a time of 21.94. Junior athlete Brandon Fuggett placed second

Lauren Brenneman

The Salisbury softball team has gone 17-4 this season and 4-0 in the Capital Athletic Conference. Junior catcher Lauren Brenneman has been a key asset to the Gulls' team this season. She was just named CAC player of the week for the second time, and leads the team with a batting average of .450.

What do you like to do when you are not playing softball?
I love the outdoors. When I am not on the field, I enjoy going out fishing with my family and friends.

Who has been the biggest influence in your softball career?
I would have to say my dad. He introduced me to the sport when I was eight years old. He knew I had potential to get where I am today and pushed me to make sure all of my dreams came true.

How do you prepare yourself for a big game?
I usually listen to music to clear my mind. When I step onto the field, I zone into the game that's ahead. It may be a superstitious, but I also eat a Reese's peanut butter egg before each double header.

How did it feel being named to come away with a singles victory.
It was a great feeling. I was really happy to be named player of the week.

How do you see yourself after college?
I will most likely end up going to graduate school to get my masters in either marine biology or ecology.

Track runs Penn Invitational

By Therran Dennis
Staff Writer

Last Saturday, the Salisbury University men's and women's track and field teams competed in the Penn Invitational at Franklin Field, hosted by the University of Pennsylvania in Philadelphia. The Sea Gulls held their own in competition as they were one of the 40 NCAA schools (Division I-II) that were invited to compete in the meet. Several sponsored club teams were also invited to take part in the invitational.

The Sea Gull men were led by junior sprinter Cory Beebe, who competed in both the 400-meter hurdles, the 110-meter hurdles and the 4x400 relay team. Beebe placed first overall in the 400-meter with a time of 53.34 seconds and placed second overall in the 110-meter with a time of 14.88. The 4x400 relay team of freshman sprinter Paul Moore, junior sprinter Quentin Briscoe, junior sprinter Mike Marfut and Beebe placed fourth with a time of 32.01, finishing behind Columbia, La Salle and the College of New Jersey.

Junior sprinter Delanie Springs from the 100-meter dash with a time of 10.78 seconds. Springs also finished second in the 200-meter with a time of 21.94. Junior athlete Brandon Fuggett placed second

The women were represented by sophomore distance runner Masha Berge who placed 17th in the women's 5,000-meter race with a time of 19.38.77. During the same day, SU sent several athletes to Towson to compete in the Goucher College Track and Field Classic. Freshman Rachael Holtzman came in third in the women's shot put (31 feet, nine and a half inches) and the women's hammer throw (102 feet, 10 inches). Freshman Jay Drenner also had a pair of third place finishes as he placed in the shot put (41 feet, one and a half inch) and the discus (124 feet, five inches).

The Sea Gull track team will compete in the two-day West Chester Invitational, starting Friday, April 10.

Sea Gulls defeat conference foe, 20-8, on Senior Day

By Edward Baidoo
Staff Writer

Last Saturday, the top-ranked Salisbury Sea Gulls defeated No. 18 St. Mary's 20-8 in a pivotal conference game on Senior Day. The victory improves the record of the Gulls to 12-1 with an unblemished conference record of 5-0. St. Mary's falls to 9-4 on the season and suffered their first conference loss, which drops their conference record to 4-1.

After the festivities to honor the seniors before the match, the Gulls got out to a quick start, scoring the first nine goals of the match. The scoring started with a goal by sophomore attacker Trish DiGirolomo at the 24:59 mark of the first half with an assist from Robyn Bishop. The assist would

be only the beginning of a stellar day by Bishop. The senior mid-fielder scored five goals on the day with an assist. Despite two of the seniors, Jessica Chmielewski and Ashleigh Gender, not being able to play because of injuries, Bishop and the rest of the team wanted to make sure the team celebrated Senior Day with a win.

"We've had a lot of injuries and two of our fellow seniors were out, so it was great for us to rally and still put twenty in the back of the net," Bishop said.

Head coach Jim Nestor was very happy with the effort that the Gulls put in versus a very good St. Mary's team Saturday.

"It was a good performance today. I thought they played well. We got everybody in, intensity did not drop and we played well,"

Nestor said.

Maggie Macleay, Caitlin Nichols and Lauren Carrier, who each had two goals, led the Seahawks. Macleay scored the first two goals for St. Mary's. Carrier's goals allowed her to maintain her streak of at least one goal in 55 consecutive games.

Coach Nestor was happy that the Gulls had a victory on Senior Day.

"It feels good, of course. It was Senior Day and we want to give our seniors that extra prize, even the ones that didn't play. St. Mary's is a great squad and we got a good win today," Nestor said.

The next game for the Sea Gulls will be on Tuesday at Wesley College for another important late-season conference match.

Pancake Breakfast Benefit

On March 27th, after suffering a seizure, Jesse Baier discovered that he has a large brain tumor and needs immediate & intensive medical attention.

In an effort to help Jesse with his rapidly rising medical costs, the Applebee's of Salisbury will be holding an all you-can-eat Pancake Breakfast on April 11th. All proceeds go directly to Jesse Baier and his family.
